

TITAN UP

THE WAR AGAINST AGEING is an ongoing battle – so when we heard about the launch of a new skin-tightening machine at Subi-aco's Assure Medispa, we thought we'd spread the word.

The Cutera Titan Procedure is the world's first light-based system to treat wrinkles through the tightening of skin in a non-surgical procedure. The machine is designed to tighten skin on the face, neck, thighs, upper arms and abdomen and works wonders on a post-pregnancy stomach. Dedicated skincare clinic, Assure Medispa's results

of this revolutionary treatment – that doesn't involve anaesthesia or recovery time – are dramatic. So how is this possible? The procedure utilises an infrared light source to safely apply heat to the dermis, deep beneath the skin's surface. This heating causes immediate collagen contractions, which generate tighter skin. The price ranges from \$800 for the neck (jowls and jaw line) or underarms, to \$1000 for full face or abdomen. *For more information and discounted prices for a treatments, contact Assure Medispa, (08) 9380 0380, assuremedispa.com.au.*
